AALIYAH ROBINSON

Aaliyah Robinson, from Woodbury, NJ, is a senior at Delaware State University (DSU)—biological science major with a concentration in health professions and a minor in chemistry.

After joining the DSU section of NCNW her freshman year, Aaliyah served as president both her sophomore and junior years. During her term, she established and led a number of service initiatives, most notably in partnership with the DSU early college program, Aaliyah launched after-school mentoring for high school girls. As a result of her efforts, the DSU section of NCNW was recognized as Volunteer Group of the Year Award by the People's Place. Additionally, because of her demonstrated campus and community leadership, Aaliyah was selected as a 2024-25 White House HBCU Scholar.

As an aspiring neuroscientist, Aaliyah will center her career on epilepsy—amplifying awareness, creating comprehensive resources, and researching to inform improved treatment methods. As a result of the invaluable knowledge and skills Aaliyah gained through various internships, she earned first place at the 2023 DSU Summer Research Symposium, neuroscience category and third place at the 21st Annual Philadelphia AMP Research Symposium and Mentoring Conference, life/biological science category.

Aaliyah is, a NCNW Bethune-Height rising changemaker!
